

What was this sold to you as? Sample: _____
Unknown if unsure

Where did you buy this substance?
Anonymous if private

Has this specific sample been tried? (circle)
Yes No Unsure

Unexpected effects, notes, other information

Contact, pick at least one, write clearly
Anonymous and confidential, we shred after testing

Email: _____

Phone: _____ Code: _____

Codes cannot be a name, city, colour or single characters

Cut this slip to keep track of your code to look up results

Date: _____ **Questions?**

Code: _____ Info@GetYourDrugsTested.com

Mail may take up to 2 weeks to arrive, results at:
GetYourDrugsTested.com/**test-results-archive**

Limitations: Samples are tested with FTIR spectrometer and test strips. We cannot determine purity. Percentages are estimated amounts of each substance present above a 5% threshold. There may still be other substances present below 5% we cannot detect. Test strips are positive when the target substance is present above the threshold. **Fentanyl: 20ng/mL, Benzo: 300ng/mL, LSD: 50ng/mL.** Test strips cannot determine concentration or differentiate between which analogues is being detected.
